Residential solar CEO reacts to Labour uncertainty on Future Homes Standard

Mohamed Gaafar, CEO and Co-Founder of GRYD Energy: "The time has come for the new government to take a firm stance on the FHS and commit to making the country's housing fit for the future. The FHS is a crucial piece of legislation that will raise the environmental standards of new homes and ensure the housing sector's energy supply is more resilient, affordable and sustainable for all."

Solar Energy UK Case Study – GRYD Energy

In a first-of-its-kind deployment, GRYD Energy delivered zero-cost smart solar systems for 3 new homes at a site in St. Ives, Cornwall. Working with new build property developers, GRYD funds the smart solar hardware on all new homes, including PV and batteries; saving developers up to £10k in hardware costs per home – while exceeding their obligations under building regulations Part L and the upcoming Future Homes Standard.
